1. Comment. Export and reparation deliveries.
2. Comment. Deliveries for the Twenty-Fourth Air Army.
3. Comment. Deliveries for the naval air force division.
4. Comment. Outgoing rail shipments dispatched by the synthetic gasoline plant in Boehlen totaled 367 tank carloads (12,797 metric tons) including 218 carloads (4,452 metric tons) in May; and 394 tank carloads (16,481 metric tons) including 190 carloads (5,879 metric tons) for the Twenty-Fourth Air Army, in June. Outgoing shipments in May were at about the same level as in April. The volume of shipments in June increased over the usual level, mainly because of increased deliveries to fuel depots of the Twenty-Fourth Air Army. It is believed that the increased deliveries to air force fuel depots was the result of heavier flying activity by the fighter divisions in June. However, there is a possibility that air force fuel dumps were replenished.
